

Analyzing Factors Affecting Football Player Performance

Course Project — Week 1: Group Formation & Topic Finalization

Group

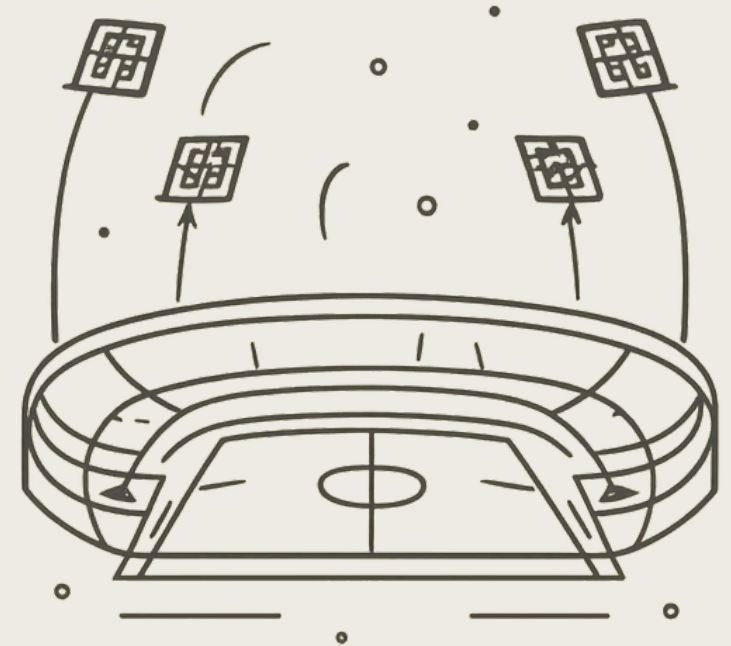

Sambarsh • Riwaj • Kaustuv

Technique

Linear Regression

Application

Player Performance Analyzer

Introduction

01

Purpose

Help clubs & coaches make
informed decisions

02

Goal

Identify key factors influencing
player performance

03

Approach

Use statistical & predictive modeling

Group Formation

Sambarsh Kshetri
Data Collection &
Preprocessing

Riwaj
Statistical Analysis &
Modeling

Kaustuv
Application Development
& Documentation

Topic Finalization

Selected Topic

Analyzing Factors Affecting
Football Player Performance

Why

Large performance datasets •
Useful for coaches • Fits
regression methods

Problem Statement

- Multiple factors influence performance
- Which factors significantly impact overall rating?
- Use Linear Regression to identify & quantify relationships

Project Objectives

1 1. Data

Collect, clean, preprocess

2 2. Analysis

Identify significant factors

3 3. Modeling

Apply Linear Regression

4 4. Delivery

Build an analyzer app & reports

Proposed Methodology

Flow from raw data to deployed Player Performance Analyzer

Expected Dataset Variables

Goals

Assists

Pass Accuracy (%)

Shots on Target

Minutes Played

Age • Matches

Target: Overall Player Rating / Performance Score

Expected Outcomes

Deliverables

Cleandataset • Analysis report
• Regression model

Tool

Player Performance Analyzer
applic ation

Final

Project report & presentation
